

Dear Commissioner Henney,

The long range effects of genetically engineered foods is completely unknown.

Believe me, I have experienced what can come about through the use of promising yet unknown-in-the-long-run discoveries of scientists. I lost my husband because a medical doctor not knowing long range effects of X-ray treatment for atopic dermatitis burned him. The

I start 50 years to spend combating the skin cancers it cause

Please do what you can to require labels on transgenic foods & if it is in your power, to force the end of genetic terminator technology by the U.S.D.A. and its seeking of force patents which would render farm saved seeds sterile. Let God help us in our efforts to feed the
